- 3+ years Modern React stack:** TypeScript, Next.js, React Three Fiber, Motion, React Spring, Remix, and Jotai
- 2+ years Modern tooling & middleware:** Sentry, Zustand, Convex, PostHog, Drizzle, and Replicate AI

PROFESSIONAL EXPERIENCE

Virginia Information Technologies Agency (VITA)

Feb 2023 – Present

Senior Web Engineer | AI Automation & CMS Architect

Remote

- Led and trained cross-functional teams managing external-facing Terminal Four CMS government websites across the Commonwealth of Virginia.
- Designed and deployed agentic AI workflows using n8n orchestration paired with Claude and ChatGPT to autonomously audit content, flag accessibility regressions, and remediate metadata at scale.
- Integrated Replicate AI for on-demand image generation, transformation, and content enrichment across CMS publishing workflows.
- Built internal productivity dashboards inside Terminal Four's Programmable Layout framework — content inventory, user audit, and stale-account reporting — using direct MySQL queries and React.
- Led modernization of legacy Java and Angular platforms, executing framework upgrades and delivering measurable gains in stability, supportability, and page performance.
- Built secure applications with React, TypeScript, Tailwind, shadcn/ui, MUI, Zustand, REST APIs, Auth0, and Docker; established component libraries and living documentation to accelerate onboarding.
- Improved sitewide SEO, indexing, metadata, and image-payload performance across all public-facing Commonwealth properties.
- Advised leadership and stakeholders on CMS governance, accessibility compliance, SEO remediation, and platform optimization strategy during secretariat-level meetings; partnered with PMO leadership on a data-dashboard proof-of-concept consolidating ServiceNow-based project data.
- Collaborate within Agile/Scrum environments using Jira, Git, and CI/CD deployment workflows.

Chris Lane Jones — Independent Consulting

Oct 2016 – Feb 2023

UX/UI Engineer & CMS Consultant

Remote

Public sector: VITA, FDOT, USDOT, AIS Network. Private sector: WorldStrides, Yellowstone Landscape, Provision Partners, AZZLY Rize, Fisher Design & Advertising, Strauss Diamond, Engage Marketing, Elvacomm.

- Architected and shipped enterprise web solutions across WordPress, Drupal, Sitecore, FileMaker, HCL Digital Experience, and Terminal Four for state agencies and private-sector clients.
- Built and ship a browser-based photo editor with a Rust image engine compiled to WASM. Moving the engine into a Web Worker cut main-thread blocking from ~130 ms to 0.
- Run it like a production product: 100 releases in a single month, architecture decision records, a QC gate on every release, and a CI size check on the WASM bundle.
- Built cross-device settings sync, share links, a beta invite system, and a paid tier with server-enforced entitlements.
- Built custom WordPress themes and plugins with PHP, Advanced Custom Fields (ACF), and Composer; modified React components for headless deployments.

- Designed user-centric prototypes and wireframes in Figma, Sketch, and Adobe XD; ran A/B tests and shipped winning variants.
- Increased organic traffic up to 60% via SEO strategy using SEMrush and Ahrefs; pushed mobile and desktop PageSpeed Insights scores to the high 90s and lifted customer retention ~40%.
- Managed AWS S3 for asset delivery, backups, and cost optimization across client portfolios.
- Enforced WCAG 2.1 AA accessibility standards: keyboard navigation, skip links, ARIA landmarks, and semantic HTML.

Blue Triangle

Nov 2021 – Jan 2023

UX/UI Engineer | WordPress Plugin Developer

Richmond, VA

E-commerce SaaS analytics platform serving Home Depot, Barclays, Lululemon, Equifax, and Kaiser Permanente (~50 employees).

- Engineered a KPI benchmark filter WordPress plugin that increased page viewership by 45% and surfaced Core Web Vitals data for partners.
- Led design and development of the new corporate website during agile sprints; coordinated company-wide releases with marketing.
- Improved landing-page speed 50% via Lighthouse/PageSpeed Insights tuning and lifted sitewide SEO performance 55%.
- Built a Core Web Vitals SaaS application with WP Codex, Composer, PHP, JavaScript, Tablesorter, and Chart.js.
- Coached team members on responsive layout, performance bottlenecks, and accessibility remediation.
- Tracked work via Jira tickets and authored technical documentation in Confluence; participated in daily agile standups and sprint planning.

Asponte Technologies

Feb 2021 – Apr 2022

Lead UX/UI Engineer (Second Contract)

Remote

Enterprise SaaS firm building HCL WebSphere, IBM, and Liferay interfaces for Taco Bell and The Habit Burger Grill (~20 employees).

- Lead designer/developer on Homebase, an HR intranet SaaS product built on HCL WebSphere; owned UX direction across multiple release cycles.
- Shipped a CSS-variable-based light/dark theming system that met WCAG 2.1 contrast requirements without duplicating stylesheets.
- Built reusable Bootstrap 4 components — cards, sortable tables, drag-and-drop interactions, and hover cards — used across the partner-facing product.
- Stack: Git, Figma, Adobe XD, CSS3, JavaScript ES6, IBM WebSphere CMS.

RS&H

Sept 2020 – March 2021

UX/UI Designer and Developer | (Contract)

Remote

National engineering firm with marquee public-sector work including NCDOT I-26 widening CEI services and the NASA Asteroid Curation Facility (~5,000 employees).

- Owned WordPress maintenance across the firm's portfolio of marketing sites and Florida public-sector properties.
- Drove a 40% lift in blog and social referral traffic through keyword strategy and on-page SEO.
- Designed HubSpot automation flows for lead nurturing and ran HubSpot A/B tests, shipping the highest-ROI variants.
- Diagnosed and repaired a broken map plugin by restructuring underlying MySQL tables.
- Built responsive landing pages for the firm's Aerospace division.
- Supported enterprise Sitecore CMS and WordPress properties alongside legacy jQuery frontend maintenance.

Asponte Technologies

May 2020 – Sept 2020

Lead UX/UI Designer and Developer (First Contract)

Remote

- Initial contract on the Homebase SaaS HR product (continued in 2021): owned UX direction, built Bootstrap 4 component library, and shipped accessible theming.
- Stack: Git, Figma, Adobe XD, CSS3, JavaScript ES6, IBM WebSphere CMS.

Allianz Travel Insurance

Aug 2019 – May 2020

UX/UI Designer and Developer | Business Team Technical Liaison

Richmond, VA

Travel insurance arm of Allianz, serving American Airlines, Amtrak, StubHub, Egencia, Vivid Seats, GradGuard, and Vegas.com (~10,000 employees). Role ended via COVID-19 layoff.

- Owned technical communication with major partner stakeholders; consulted on every development project and translated engineering decisions for the business team.
- Migrated React-based insurance offer components into Allianz's proprietary Fusion Core CMS.
- Presented UX/UI designs for upcoming insurance offers at monthly roundtable events and discussed Thompson sampling A/B results in agile sprints.
- Built mockups in FileMaker Pro for partner-facing project reviews; produced human-centered designs tailored to each partner brand.
- Maintained critical legacy applications written in VBScript and Classic ASP.
- Stack: Bootstrap 4, Adobe XD, Sass, Fusion Core, Node.js, JavaScript.

Adecco & Special Counsel

UX/UI Designer and Developer

Sept 2018 – Nov 2018

Jacksonville, FL

International staffing and recruiting firm (~10,000 employees). Left to relocate to Virginia.

- Launched national event landing pages on Sitecore CMS that drew over 1.5 million yearly views.
- Trained team members on WordPress SEO fundamentals and on-page optimization.
- Stack: Bootstrap 3, Git, Adobe XD, Sass, Adobe Illustrator and Photoshop, Figma, Sitecore CMS, WordPress, jQuery, and JavaScript.

Web.com

UX/UI Designer and Developer | SEO Specialist

Oct 2015 – Sept 2018

Jacksonville, FL

Large national web services company, now Newfold Digital (~3,000 employees at the time).

- Shipped portfolio-grade responsive websites for small-business clients using HTML, CSS, JavaScript, and jQuery, working at production volume against tight turnaround SLAs.
- Built e-commerce sites with client-friendly CMS handoffs and ran post-launch CMS training so clients could maintain their own content.
- Mentored and onboarded new designers on the team; established shared patterns for responsive breakpoints and layout consistency.
- Authored SEO strategy and on-page metadata that produced measurable traffic gains across client sites.

VOLUNTEERING

Richmond WordPress Meetup Group — Organizer | Richmond, VA | Jan 2023 – Jan 2025

The Point Church (Louisa Campus) — Stage Production Lights / Parking Services | Louisa, VA | May 2020 – Sept 2026
